

## Special Issue

# New Insights into Understudied Phenomena in Healthcare

### Message from the Guest Editors

Understanding health as a complete state of well-being has introduced previously unfamiliar challenges to healthcare professionals. Alongside changes in paradigm positions, the emergence of new diseases, the use of new technologies, the research into new therapeutic approaches and the development of new disciplines in healthcare all contribute to emerging understudied phenomena. Unfortunately, understudied phenomena have received little attention in healthcare research. Various research approaches, methodologies and designs can improve our understanding of understudied phenomena in healthcare. Therefore, we invite colleagues from all healthcare disciplines to submit papers using qualitative, quantitative or mixed-methods approaches. As an example, submitted papers could focus, on new insights into our understanding of understudied populations' healthcare needs, analyzing the characteristics and/or effects of innovative care programmes delivered for understudied populations, or describing ground-breaking educational interventions to improve healthcare professionals' competence to care for understudied populations.

### Guest Editors

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1  
(Leadership and Management)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
