

Special Issue

Detection, Prevention and Management of Oral Health Issues

Message from the Guest Editor

Multiple diseases or disorders of the oral and maxillofacial system may lead to the loss of hard and soft tissues, which causes serious effects including stunting, mastication dysfunction and facial alteration. The most common chronic inflammation in craniofacial region, periodontitis and apical periodontitis, lead the loss of alveolar bone, resulting in maxillofacial bone defects and ultimately tooth loss. In addition, maxillofacial surgery, trauma, tumors and other diseases can also lead to bone defects. Due to the specific location, maxillofacial bone defects not only affects physiological functions but also have an impact on the patients' aesthetics. Yet, maxillofacial bone repair and regeneration is still an unsolved clinical challenge. This Special Issue is looking for recent advances in oral health, particularly as regards the repair and regeneration of maxillofacial bone defects. Papers focused on tissue engineering, bone repairing and regeneration, stem cells and clinical application are especially welcome.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q1 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
