

Special Issue

Gynecological Cancer Diagnosis and Prevention

Message from the Guest Editor

Oncology strives for screening programs and early diagnoses. The aim of this Special Issue is to focus our attention on gynaecological cancer and the possibility of preventing these tumours, tacking stock of the situation. The World Health Assembly in 2020 calling for the “Elimination of Cervical Cancer” by 2030 through achieving the following three targets: vaccination, screening, and precancerous lesion treatment. Annual pelvic ultrasounds allow us to see the uterus, ovarians, and fallopian tubes, as well as the presence of cysts and fibroids, thus presenting a potentially valid strategy for the early diagnosis of endometrial cancer. Several tests have been evaluated as potential methods of screening for ovarian cancer. We hope to clarify these delicate aspects of oncological gynecology.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with Healthcare and its members receive discounts on article processing charges.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
