

Special Issue

Data-Driven Strategies for Patient Safety and Clinical Risk Mitigation

Message from the Guest Editors

We invite you to submit your research to the *Healthcare* journal's Special Issue, "Data-Driven Strategies for Patient Safety and Clinical Risk Mitigation". Patient safety is a priority in healthcare, as deficiencies frequently lead to preventable adverse outcomes, higher rates of illness and death, prolonged hospital admissions, and an overall decline in patient well-being. Beyond the clinical repercussions, these failures impose substantial economic challenges for healthcare institutions, including fines, legal expenses, and harm to their public image. To address these challenges, there is a growing need for comprehensive, data-driven approaches that integrate evidence-based practices with advanced technologies. We welcome original research and review articles. Topics of interest include, but are not limited to, the following:

- Empirical studies exploring topics related to patient safety or clinical risk mitigation;
- Machine learning or predictive analytics studies exploring topics related to patient safety or clinical risk mitigation;

We look forward to receiving your valuable contributions.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
