# Special Issue

# Holistic Approaches to Aging in Place: Health, Safety, and Community

## Message from the Guest Editors

This Special Issue aims to explore and disseminate innovative research and practices that promote aging in place, and to compile a diverse array of studies that reflect the multidisciplinary nature of this field. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following themes:

- Innovative technologies for aging in place: smart home systems, wearable devices, telehealth, and other assistive technologies;
- Health and wellness: strategies to promote physical, mental, and emotional well-being among older adults;
- Community support and social networks: programs and interventions that enhance community engagement and social support for seniors;
- Policy and practice: examination of policies, programs, and practices that facilitate aging in place;
- Environmental design: designing age-friendly homes and communities that support independent living;
- Caregiving and support services: role of caregivers, support services, abuse and violence prevention, and respite care in promoting aging in place.
