

Special Issue

Healthcare and Disease Control Measures in Ophthalmology

Message from the Guest Editor

Ocular diseases affect one of the five senses and, if not diagnosed and treated, have a very negative impact on the daily life of patients who are affected, to the point of modifying their quality of life. Original articles and reviews on the prevention of blindness will be considered, as well as risk assessment in health screening, adequate follow-up examinations, and appropriate frequency of therapies. Particularly welcome are the publications that address the issues of preventing blindness from glaucoma or macular diseases, screening programs to identify and treat these pathologies early, strategies for carrying out visits, and treatments on schedule even in emergency situations.

- glaucoma
- macular disease
- diabetic retinopathy
- screening programs
- intravitreal injection
- prevention
- healthcare
- eye disease control measures
