

## Special Issue

# The Latest Advances in Visual Health

### Message from the Guest Editor

Protecting eye health is crucial to maintaining a good quality of life. Optometry emerges as an indispensable ally in this task. This area of health sciences is dedicated to preserving visual health and correcting refractive errors through comprehensive eye examinations. It applies the necessary techniques for detecting, following up, and rehabilitating visual health anomalies and manages the prevention of eye diseases. AI is revolutionizing the eye and vision health landscape, offering innovative solutions to improve diagnostic accuracy, personalized treatments, and efficiency of patient care. This Special Issue aims to explore the ever-evolving landscape of eye health, highlighting new clinical approaches, technological advances, and their integration with artificial intelligence (AI). It is intended to provide insight into novel techniques in clinical practice, experimental, analysis, detection, anomaly tracking, treatment and visual rehabilitation, instrumentation for diagnosis and improvement of visual quality, and the ethical and social impact of AI in the eye area.

### Guest Editor

Dr. Maria Serramito-Blanco

Department of Optometry and Vision, Faculty of Optics and Optometry, Oculopharm Research Group, Complutense University of Madrid, 28037 Madrid, Spain

### Deadline for manuscript submissions

17 December 2025

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1  
(Leadership and Management)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
