

Special Issue

Infectious Disease Prevention and Public Health Promotion

Message from the Guest Editor

To 'ensure healthy lives and promote well-being' is one of the main goals adopted by the United Nations. According to the World Health Organization's plan, five of the principal global health needs are related to the infectious diseases, such as HIV testing, treatment, and viral suppression of 95%–95%–95%, respectively, and to reduce viral hepatitis as a main global threat. To face the current SARS-Cov-2 pandemic, infections prevention and public health promotion are even more important. Moreover, under-served populations are still a fundamental global issue to plan communicable diseases' control. This Special Issue aims to include papers on Infectious Diseases Prevention and Public Health Promotion, in order to propose new approaches and strategies in field.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA
