Special Issue

Virtual Reality Technologies in Health Care

Message from the Guest Editors

Virtual reality (VR) offers extraordinary possibilities for healthcare. Continued improvements in hardware and software, coupled with the reduced cost of interaction devices, are driving the adoption of these technologies in multiple fields, including education and healthcare delivery. We are pleased to invite you to share experiences, usage cases and novel proposals of VR technologies for healthcare, including reviews, experimental results, usability analyses, challenges and possible barriers (e.g., resistance to wear HMDs or head-mounted displays). Such a compilation of results will allow readers to discover the real capabilities and future potential of VR technologies for healthcare.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.
Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special
issues.
We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista
Louise Herrington School of Nursing, Baylor University, Dallas, TX 75246-1754, USA

Author Benefits

High Visibility:
indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:
JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
