

# Special Issue

## Dementia and Care

### Message from the Guest Editors

This Special Issue spotlights the topic of dementia care as it is experienced both by people living with dementia and by those who provide care. The issue will place a particular focus on the relational basis of dementia and caring.

In the context of this Special Issue, care could mean informal support provided by family members/friends, or it could be related to formal support provided by paid carers. Specific matters for consideration might include agency and personhood; spousal relationships and families; formal care services; social networks; neighbourhood and the lived environment; technology and digitalisation; and autonomy, dignity, and safety.

We welcome article submissions from across the full breadth of healthcare-related disciplines, including medicine, nursing, allied health professions, psychology, gerontology, sociology, and social work. We would also be very pleased to receive submissions that have a multidisciplinary basis.

---
