

Special Issue

Management Topics in Medical Rehabilitation

Message from the Guest Editors

The main goals of medical rehabilitation are to minimize the functional consequences of health troubles and to improve the quality of patients' life. The whole joint "rehabilitation journey" of a patient, family, rehabilitation doctor, and staff usually begins in the acute medical department, continues to a sub-acute rehabilitation setting, and finishes at home in outpatient community clinics. This Special Issue aims to contribute to the development of evidence-based knowledge in order to improve rehabilitation management principles in various healthcare systems.

Original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

Management and clinical aspects of different rehabilitation inpatient and outpatient settings.

Rehabilitation quality and effectiveness assessment tools.

Rehabilitation staff, including rehabilitation doctors' professional activity analysis.

Studies, based on local and national medical rehabilitation experience.

Comparative studies of different management models and protocols in the same area.

Cross-sectional studies for cultural adaptation in rehabilitation in specific areas and countries.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
