

## Special Issue

# Artificial Intelligence Innovations and Applications in Trauma, Urgent and Emergency Care: Current and Prospects

### Message from the Guest Editors

Emergency medicine relies on specialised expertise and facilities to prevent, diagnose, monitor, and manage acute and urgent illnesses and injuries in all age groups.

Recent innovations in artificial intelligence have provided exciting opportunities in emergency medicine for diagnosis, monitoring and management of a broad range of conditions. These innovations have the potential to improve patient care and treatment, reducing risk to patients, optimising resource allocation, and providing an improved experience for clinicians and their patients.

Artificial intelligence techniques are usually most effective when they can show transparency in their decision making. Furthermore, combinations of techniques such as neuro-fuzzy can build on the strengths of individual techniques. Adaptive systems with an ability to learn from their operating environment can assist with complex decision-making tasks, resulting in higher chances of patient surviving their trauma.

You are warmly invited to submit your original articles to the Special Issue “Artificial Intelligence Innovations and Applications in Emergency Medicine: Current and Prospects”.

### Guest Editors

Prof. Dr. Reza Saatchi

Department of Engineering and Mathematics, Sheffield Hallam University, Sheffield S1 1WB, UK

Prof. Dr. Derek P. Burke

The General Hospital Jamestown, Jamestown STHL 1ZZ, Saint Helena

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1  
(Leadership and Management)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
