

Special Issue

Sexual Satisfaction and Sexual Pleasure across Gender and Sexual Orientation

Message from the Guest Editor

Sexual satisfaction has been conceptualized as the perceived contentment and satisfaction with sex life within an intimate relationship or as sexual activity alone, as well as the absence of sexual distress. Sexual satisfaction and sexual pleasure are important to sexual health and are considered by the World Sexual Health Association to be a sexual right that should be promoted and improved among individuals and couples. We are pleased to invite you to contribute scientifically and theoretically to the field of human sexuality, particularly to the field of sexual satisfaction and sexual pleasure. Research areas may include (but not limited to): Scoping reviews, systematic reviews and meta-analyses on sexual satisfaction and sexual pleasure
Longitudinal and cross-sectional studies on sexual satisfaction and sexual pleasure, and psychological and/or physiological correlates
Cross-cultural studies and/or the influence of cultural and social dimensions on sexual satisfaction and sexual pleasure
Intervention projects (and outcomes) on promoting sexual satisfaction and sexual pleasure in individuals and/or couples.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA
