

Special Issue

Prevention and Management of Chronic Diseases

Message from the Guest Editors

The prevention and management of chronic diseases is one of the most important areas of public health. When civilization diseases are added, there appears to be a field for planning health promotion strategies and building a public health policy. This Special Issue provides an ideal possibility for exchanging views and concepts to improve public health policies. This Special Issue aims to:

- Create new solutions in the area of public health policy relating to chronic diseases;
- Create new ways of effective prophylaxis for chronic diseases;
- Find ways of improving the quality of life of patients with chronic diseases;
- Become a platform for exchanging the experiences of specialists.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Health promotion;
- Public health strategies;
- Prevention of civilization diseases;
- Prevention of chronic diseases;
- Health management;
- Quality of life with chronic diseases.
