

Special Issue

Integrated Care Services for Cerebral Palsy: Multidisciplinary Approaches, Challenges, and Emerging Solutions

Message from the Guest Editors

Cerebral palsy (CP) is a lifelong neurodevelopmental disorder requiring coordinated, multidisciplinary care addressing motor, cognitive, and psychosocial needs. This Special Issue will focus on integrated care services that bridge gaps between disciplines such as medicine, psychology, engineering, education, occupational therapy, speech therapy, physiotherapy, and social work. We welcome original research articles, systematic reviews, and case studies exploring the following: (i) Innovative models of multidisciplinary collaboration in CP care;

(ii) Challenges in service coordination, accessibility, and equity across healthcare systems;

(iii) Emerging solutions, including digital health tools, telehealth, and policy frameworks;

(iv) Lifespan perspectives, from early childhood to advanced age;

(v) Educational and psychosocial and support for individuals with CP and their families.

Guest Editors

Dr. Sofia Santos

Dr. Martim Santos
