

Special Issue

Early Intervention for Infants and Toddlers with Developmental Delay, Disability, and Behavioral Health Considerations

Message from the Guest Editors

The aim of this Special Issue is to highlight recent advances in the field of early intervention for young children with disabilities. This Special Issue of *Healthcare* is soliciting manuscripts addressing topics related to strategies, initiatives, and interventions designed to promote contemporary early intervention practice. Original articles and reviews on intervention, professional development, and policy, as well as on the evaluation of EI strategies, are invited. Papers that focus on research, leadership, education, and advanced practice are of particular interest. Papers that explore professional development and administrative methods will also be considered. We are particularly interested in papers that explore the intersection of disability and behavioral healthcare and team-based practices. Papers that explore international perspectives, especially those from low- and middle-income countries and areas of conflict, are also of interest. We look forward to receiving your submissions.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
