Positive Psychology in Healthcare: Interdisciplinary and Intercultural Perspectives

Message from the Guest Editors

As definitions of health and wellbeing extend from the biological and physical to the psychological, mental, spiritual, cultural, emotional, behavioral, and social, the role of positive psychology (PP) in healthcare becomes increasingly relevant. We would like to invite you to submit research presenting contemporary applications of PP in healthcare. Articles may explore the role, application, and impact of different aspects of PP on healthcare in relation to its effects on patients and healthcare workers, health and mental health. Perspectives (also see the journal's 'scope') may include inpatient care, chronic care, critical care, nursing, sport, prevention, and treatment. Articles, whether they are quantitative, qualitative, mixed-methods research, reviews, case reports, research notes, or short communications, should conform to the journal's requirements. Positive autoethnographies and positive autoethnographic case studies will also be considered.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
