

## Special Issue

# Nutritional and Metabolic Disorders

### Message from the Guest Editor

Metabolic and nutritional disorders have been emerging as major conditions affecting a huge percentage of the population, and their prevalence is still rising rapidly, which accounts for related health problems with a higher incidence of all-cause mortality globally. This Special Issue of *Nutrients* will focus on all aspects of metabolic and nutritional disorders. It includes research at the molecular, cellular, and organismal levels, highlighting the relevance of diet in metabolic dysfunctions, notably the role of nutrients or dietary compounds in molecular mechanisms in the disorders of human nutrition and metabolism. We aim to publish original research articles and up-to-date review articles covering the broad and multidisciplinary fields of human nutrition and metabolism. This Special Issue, “Metabolic and Nutritional Disorders”, welcomes submissions of studies on, but not limited to, obesity, diabetes, metabolic syndrome, hyperlipidemia, other body fat disorders, the molecular and cellular biology of nutrients, foods and dietary supplements, and macro- as well as micronutrients, including vitamins and minerals.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1  
(Leadership and Management)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
