Measuring and Improving Quality of Life in the Medical and Psychological Healthcare Context

Message from the Guest Editor

The assessment of QoL is increasingly being considered as an integral part of any intervention that aims to promote health and well-being. We are pleased to invite you to contribute to our Special Issue on the “Measuring and Improving Quality of life in the medical and psychological Healthcare context”. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Systematic reviews and meta-analyses of existing assessment tools in healthcare contexts;
- Psychometric studies measuring assessment tools for quality of life;
- Studies measuring the health-related quality of life;
- Quality of life and interventions in disabilities condition;
- Personality traits related to chronic diseases;
- Systematic reviews of burnout in healthcare workers;
- Management and assessment of chronic diseases.

We will be happy to review your contributions to our Special Issue in the Journal *Healthcare*. I look forward to receiving your contributions.
