

Special Issue

Sleep Disorders Management in Primary Care—Second Edition

Message from the Guest Editor

This Special Issue solicits manuscripts addressing topics related to the evaluation and management of sleep disorders and their symptoms in primary care settings. Original articles, commentaries, and reviews on the prevalence, screening, evaluation, and diagnostic strategies of sleep disorders in primary care, as well as evaluation of the risk factors, natural history, and consequences of sleep disorders and on the topics of management and treatment options available, will be considered. The aim of this Special Issue is to provide updated information about the current screening, diagnosis, and management of sleep disorders in primary care settings. Additional research to identify potential barriers to effectively addressing sleep disorders and to improve the diagnostic accuracy of screening tools and the provision of sleep services in primary care are particularly welcome.
