

Special Issue

The Outcome of Sepsis: Second Edition

Message from the Guest Editors

Sepsis remains the top reason for mortality and morbidity in intensive care, affecting both developed and developing countries. Despite research advancements, there is limited knowledge about medium- and long-term outcomes of the host response to bacterial, viral and parasitic pathogens. Given the importance of the subject and success of the first edition, we would like to explore this topic further. The second issue will be open to any subject related to the determinants, outcomes, conceptual framework, simulation, estimates and intervention related to medium- (months) and long-term (years) outcomes of a variety of pathogen-host interactions. Topics of interest include, but are not limited to, the following:

- Conceptual framework related to evolution of the pathogen-host interaction
- Determinants of the unfavorable resolution of the post-infection sequela;
- Clinical, societal and economical impact of post-infection resolution
- Disparities leading to bias in outcomes
- Comparative studies focusing on different countries and healthcare systems
- Estimates of impact
- Interventions leading to improving long-term outcome of inflammatory sequel

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
