

Special Issue

Oral Healthcare and Prevention during the Pandemic

Message from the Guest Editor

The scope of this Special Issue is to gather reports on how oral health has been affected by the pandemic in terms of prevention, care, oral manifestations, diagnosis, and prognosis. Furthermore, of particular interest are experiences of innovative approaches in the offer of public oral health services for the prevention and management of oral health issues. Finally, contributions on how (and if) dental schools should modify their students' curricula will be appreciated.

Guest Editor

Dr. Daniela Carmagnola
