

Special Issue

Oral Diseases and Conditions: Prevention and Orthodontic Treatment

Message from the Guest Editor

Orthodontics is the branch of medicine that studies dental occlusal relationships and the skeletal relationships of the jaws. A fundamental aspect in orthodontic treatment is to first evaluate the etiopathogenesis of various malocclusions, masticatory dysfunction, TMJ and orofacial pain disorders, salivary disorders, oral breathing (day time and night time) and orofacial myofunctional disorders, which can be of genetic or environmental origin, or habitual and lifestyle-dependent.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA
