Special Issue

Advances in Artificial Intelligence for Disease Management and Clinical Documentation Improvement

Message from the Guest Editors

We are pleased to invite you to contribute to this Special Issue entitled "Advances in Artificial Intelligence for Disease Management and Clinical Documentation Improvement". This Special Issue focuses on digital health and informatics, leadership and governance, health policy, quality and patient safety, healthcare delivery and access to healthcare, healthcare financing and economics, organizational and cultural change, and the management of health resources. It provides a peer-reviewed forum for the publication of briefings, discussions, applied research, case studies and systematic reviews, expert comments, and empirical analyses regarding applied healthcare research and AI-based applications. This Special Issue aims to provide healthcare leaders with scientific and evidence-based information to facilitate the development, implementation, and evaluation of complex healthcare interventions in order to enhance the efficiency and effectiveness of healthcare management and policy strategies.
