

Special Issue

Prevention, Diagnosis, and Treatment of Breast Cancer

Message from the Guest Editors

Breast cancer is the most common non-skin cancer in women today, affecting 1 in 8 women. This Special Issue will promote the publication of high-quality original research and review articles pertaining to the prevention, screening, diagnosis, and treatment of breast cancer. The treatment of breast cancer is rapidly evolving, with treatment becoming more individualized. This issue aims to discuss the latest developments in the multidisciplinary management of breast cancer care, including radiology, medical oncology, radiation oncology, plastic surgery, and surgical oncology. We welcome basic science and clinical research pertaining to breast cancer.

- breast cancer
- lymphedema
- imaging
