

Special Issue

Healthcare Innovations in Global Mental Health and Addiction Treatment

Message from the Guest Editors

Mental health and substance use disorders constitute a critical yet persistently neglected global health challenge. This Special Issue will be dedicated to advancing evidence-based, equitable strategies in mental health and addiction care. Submissions should align with the following thematic priorities:

- *Innovative Interventions*: Empirical evaluations of novel therapies (e.g., digital therapeutics, psychedelic-assisted therapy) and community-led models in resource-constrained settings.
- *Cultural and Contextual Relevance*: Critical analyses of culturally adaptive diagnostic tools, stigma reduction campaigns, and treatment modalities for diverse populations.
- *Health System Integration*: Case studies on integrating mental health and addiction services into primary care platforms and SDG-aligned programs.
- *Socioeconomic and Environmental Determinants*: Investigations into the intersections of mental health, poverty, discrimination, climate change, and substance use.
- *Global Governance and Collaboration*: Policy analyses of funding mechanisms, cross-sector partnerships, and international frameworks for equitable care delivery.
