Special Issue

Rheumatic Diseases and Related Conditions in Healthcare

Message from the Guest Editor

Rheumatic diseases entail physical and mental wear and tear on the patients who suffer from them. These conditions are chronic, non-transmissible diseases, and have no curative treatment. Therefore, it is of particular interest to know more about rheumatic diseases and their coexistent pathologies, such as cardiometabolic, hematological, or malignant diseases. For this Special Issue, we request manuscripts that consider topics related to rheumatic diseases in medical care. Original research and review articles are welcome which evaluate rheumatologic disorders and their coexistence with other conditions such as cancer, cardiometabolic diseases, or hematologic diseases. Work which include treatment methods are welcome. An additional and equally important consideration will be given to studies that focus on the education and prevention of a diverse array of rheumatologic diseases.

- rheumatic diseases
