

Special Issue

Contemporary Clinical Advances in Endodontics

Message from the Guest Editors

This Special Issue invites high-quality clinical studies and systematic reviews that investigate the effectiveness, safety, and clinical relevance of new approaches in endodontic practice. We particularly welcome submissions that provide measurable outcomes in patient care and support evidence-based decision making. Areas of interest include, but are not limited to, the following:

- Minimally invasive endodontics;
- Irrigant activation techniques with proven clinical benefits;
- Bioactive endodontic cements in clinical settings;
- Endodontic microbiology with direct treatment implications;
- Vital pulp therapy with clinical outcome data;
- Regenerative endodontics with demonstrated patient benefit;
- Micro-surgical endodontics with long-term follow-up;
- Use of 3D and guided technologies with clinical outcome measures.

We look forward to your contributions in shaping the future of evidence-based endodontic care.
