

## Special Issue

# Novel Research and Care Strategies for Older Adults with Stroke and/or Dementia

### Message from the Guest Editors

As populations across the globe continue to age, the prevalence of age-related conditions such as stroke and dementia is rising sharply, posing significant challenges to healthcare systems, caregivers, and communities.

These complex conditions often co-occur, compounding the burden on individuals and requiring integrated, person-centred approaches to care. This Special Issue, “Novel Research and Care Strategies for Older Adults with Stroke and/or Dementia”, seeks to explore novel research, interventions, and models of care that address the multifaceted needs of older adults living with stroke, dementia, or both. We invite contributions that examine novel clinical practices, interdisciplinary care models, technological innovations, and policy frameworks that enhance the quality of life, autonomy, and dignity of older people. Submissions may include original research, systematic reviews, implementation studies, and case reports that highlight best practices in prevention, diagnosis, rehabilitation, long-term care, and caregiver support.

## About the Journal

### Message from the Editor-in-Chief

*Healthcare* is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

*Healthcare* hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.
