## Special Issue

# Somatopsychology: When Madness Arises from the Body

## Message from the Guest Editor

Mental disorders are not only generated by psychosocial causes. In the field of somatic causes of mental disorders, one can, e.g., distinguish between infectious, genetic, endocrine, metabolic, and neurological disorders. In addition, there are organ diseases, for example, anemia, heart failure, or pulmonary dysfunction, which can result in cognitive disorders. Kidney or liver diseases can lead to poisoning, which then also negatively affects mental processes. In addition to reduced neurotransmitters, the immune system has increasingly come into focus in the search for the causes of burnout, depression, and fatigue syndrome. Someone who is ill shows typical sickness behavior, which also includes symptoms that loosely resemble a depressed state of exhaustion. Even a succinct flu infection causes psychological changes. Thus far, there has no systematization of somatopsychology. This Special Issue will collect examples from different fields, e.g., psychoendocrinology, psychoneuroimmunology, changes in blood values, metabolic disorders, or neurological disorders that lead to psychological symptoms.

## **About the Journal**

## Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special

We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

issues.

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX 75246-1754, USA

#### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

## **Journal Rank:**

JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
