

Special Issue

Nursing Care for Cancer Patients: Second Edition

Message from the Guest Editor

With aging populations and advances in cancer screening and treatment technologies, the number of cancer survivors has increased substantially worldwide in recent decades. It is well-accepted that cancer and its treatment not only affect the patient but also their close family members leading to the description of cancer as a 'we-disease'. In addition, the COVID-19 pandemic has impacted cancer care worldwide. Many countries reduced face-to-face consultations to minimize the risk of nosocomial infection and redirected care to people with COVID-19. This Special Issue of *Healthcare* seeks all types of study design, including papers reporting systematic reviews and meta-analyses, quantitative, qualitative, or mixed methods studies, case studies and other designs, in accordance with cancer care associated with supporting cancer survivors, family caregivers, and oncology professionals. We are particularly keen to include studies focusing on colorectal cancer, long-term survivorship care, supporting self-management and rehabilitation, oncology-nurse-led survivorship care, eHealth, or web-based interventions in this regard.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
