

## Special Issue

# Instruments and Measures for Health, Education, and Sport Research

### Message from the Guest Editors

Effective instruments and measures are vital for research in the fields of health, education and sport. Many tools have been proposed in the literature, but in various cases, information is still lacking as regards their validity and reliability. Meanwhile, the need to develop brief and time-efficient measures has been on the rise in order to avoid putting excessive demands on respondents, along with all the associated effects on the economic viability of the research and on the quality of the data. Moreover, many of the existing instruments have only been validated in specific national contexts and it has been proven necessary to assess their psychometric properties in different linguistic and cultural settings. In many emerging research fields, it is also necessary to develop and validate self-report measures for investigating new constructs that have been proposed in the context of recent theoretical approaches. This Special Issue therefore calls for papers that are intended to remedy these gaps in health, education and sport research.

### Guest Editors

Dr. Fabio Alivernini

Dr. Federica Galli

Dr. Sara Manganelli

### Deadline for manuscript submissions

closed (30 June 2024)

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1  
(Leadership and Management)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
