New Preventive Healthcare Strategies: The Contribution of Digital Technologies and Models for Weight Gain Prediction

Message from the Guest Editor

The early detection of being overweight is crucial to prevent weight gain and delay the following onset of chronic non-communicable diseases. Behavioral risk factors associated with obesity are well known: sedentary behavior, lack of physical activity, unbalanced diet, too many calories, consumption of ultra-processed food products, lack of sleep, too much stress, etc. A holistic approach of behaviors evaluated accurately in free-living conditions is necessary to understand their respective contribution to overall health damage and to come up with new preventive strategies.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, Irvine, CA 92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
