

## Special Issue

# The Correlates of Technology-Based Addictive Behaviors and Their Impacts on Wellbeing

### Message from the Guest Editors

This Special Issue aims to examine and advance understanding surrounding technology-based addictive behaviors and their correlates and impacts on wellbeing through rigorous and empirical research. It is also important to address policy implementation that involves all stakeholders in screening and preventing technology-based addictive behavior; such legislation has the potential to reduce its harm on human wellbeing, capture the broad lessons emerging from global cross-country scholars, inform practices, and enhance capacity for tackling such addictions. We welcome original research articles and reviews for submission to this Special Issue. We look forward to receiving your contributions.
