

Special Issue

Continuum of Care: Assessment, Management and Rehabilitative Interventions to Improve Care across Different Settings

Message from the Guest Editors

In this Special Issue, original manuscripts as well as reviews which address the problems of patients with sequelae of central nervous system diseases in their territorial phase are welcome. Specifically, some (but not all) of the potential areas of interest include: rehabilitation and health management interventions for maintaining motor function in the area, the prevention and treatment of cognitive decline, as well as intervention for improving social participation and returning to work.
