

## Special Issue

# Prehospital and Hospital Care for Stroke Patients

### Message from the Guest Editor

In recent decades, advances in acute stroke care have enabled the early detection of stroke, which has greatly improved outcomes. As a consequence, stroke has become a largely treatable disease, and time is the factor with the greatest influence on the evolution and final prognosis of the patient in the short, medium and long term. However, despite the significant efforts made to reduce stroke care time, such as the training of emergency medical services staff, the improvement of the organization of care pathways with the installation of systems such as "Code Stroke", the creation of stroke units, the advances in the field of telemedicine or the implementation of outreach campaigns aimed at the general population, only a small percentage of patients benefit from the reperfusion treatments available in the acute phase, which prevents a significant benefit at the population level. This Special Issue dedicated to the prehospital and hospital care of stroke patients is an opportunity to provide new insights into the prehospital and hospital management of stroke in the acute phase.

## About the Journal

### Message from the Editor-in-Chief

*Healthcare* is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

*Healthcare* hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX  
75246-1754, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1  
(Leadership and Management)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
