

Special Issue

Physical Therapy and Rehabilitation of Neurological Disorders

Message from the Guest Editors

Physiotherapy and clinical rehabilitation offer different approaches for the assessment and management of neurological disorders. As of now, there has been considerable research regarding physical therapy and clinical rehabilitation areas; however, standardized protocols for the clinical assessment and key therapies of neurological pathologies requiring physical therapy interventions are still needed. This Special Issue aims to serve for the discussion of all aspects of motion analysis, physiotherapy, and rehabilitation studies, including evaluation, treatment, and prevention. For this SI, I would like to invite researchers to contribute their expertise, insights, and findings in the form of novel and original research articles and reviews based on studies of pain and functionality in neurological disorders. We invite manuscript submissions for inclusion in a Special Issue of *Healthcare*, entitled "Physical Therapy and Rehabilitation of Neurological Disorders". Studies using quantitative, qualitative, mixed methods, or systematic reviews with or without metanalysis are considered.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
