Safety, Security and Privacy Aware ICT Health Systems: Cross Border Engineering Strategies and Challenges in the Healthcare Setting

Message from the Guest Editors

Information and Communication Technologies (ICT) are ubiquitously and growingly adopted in health care provider's systems to cope with a very wide range of health domains including diagnostics and therapeutics, administration and accounting, health infrastructure service and maintenance, e-health services, mobile and tele-care. While ICT solutions certainly have the potential to give an important contribution to healthcare goals, they are being introduced into healthcare ICT infrastructures that were not purposely designed to consistently deal with security and safety issues. Given this scenario, there is a need to explore new, cross-border collaborative approaches among physicians, ICT professionals, clinical/biomedical engineers, managers, as well as ICT systems and medical devices manufacturers in order to maintain efficiency, safety, and resiliency of health care workflows and health care provider's systems. This Special Issue calls for interdisciplinary technical descriptions of real life experiences, approaches, regulatory and technical standards issues, seeking original papers proposing safe, secure, and privacy preserving ICT related experiences.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with Healthcare and its members receive discounts on article processing charges.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
