

Special Issue

Preventive Medicine and Palliative Care

Message from the Guest Editor

Emerging evidence shows the positive impact of palliative care for patients, families and/or caregivers, health care providers, and society at large. Despite several conceptual and operational developments over the past several decades, the medical specialty of palliative care continues to be associated with people who are imminently dying. More recently, the term “palliative approach to care” and its underlying philosophy are emerging. Introduced by the Canadian Hospice Palliative Care Association, a palliative approach to care makes certain aspects of palliative care available to clients and families at appropriate times throughout the illness trajectory. This shift in the terminology underscores the preventative role of this specialty. The purpose of this Special Issue on “Preventative Medicine and Palliative Care” is to highlight recent advances, challenges and solutions for palliative care provision and education, such as risk assessment models, program and policy development, and education for health care professionals and the public.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
