

## Special Issue

# Digital Health and AI for Chronic Disease Control and Management

### Message from the Guest Editor

This Special Issue aims to explore the transformative role of digital health technologies and artificial intelligence (AI) in the control and management of chronic diseases. With the rising prevalence of conditions such as diabetes, cardiovascular diseases, and respiratory disorders, innovative solutions are essential for enhancing patient outcomes and optimizing healthcare delivery. We invite contributions that examine the integration of digital health tools—including mobile health applications, wearable devices, telemedicine, and AI-driven analytics—into chronic disease management strategies.

### Guest Editor

Dr. Weike Zhang
