

Special Issue

Digital Health and AI for Chronic Disease Control and Management

Message from the Guest Editor

This Special Issue aims to explore the transformative role of digital health technologies and artificial intelligence (AI) in the control and management of chronic diseases. With the rising prevalence of conditions such as diabetes, cardiovascular diseases, and respiratory disorders, innovative solutions are essential for enhancing patient outcomes and optimizing healthcare delivery. We invite contributions that examine the integration of digital health tools—including mobile health applications, wearable devices, telemedicine, and AI-driven analytics—into chronic disease management strategies.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q1 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)
