# Exploring the Link between Cardiorenal and Metabolic Diseases

### Message from the Guest Editors

Metabolic diseases, like obesity and diabetes mellitus, are well-known risk factors for both cardiovascular and chronic kidney diseases. This influence takes place not only through direct factors such as hypertension, but also through indirect pro-inflammatory/pro-atherogenic effects mediated by adipokines and other hormones secreted by adipose tissue. In turn, chronic kidney disease is a systemic inflammatory syndrome that predisposes to cardiovascular disease and impacts metabolism through pathways favoring inflammation, oxidative stress, and insulin resistance. Thus, a better understanding of the link between the kidney–heart axis and metabolic alterations will spur the search for metabolic markers to identify the preclinical stages of the cardiorenal disease. This will lead to the more accurate management of the complications derived from chronic kidney disease and metabolic disorders. We seek articles exploring the biological and environmental (diet, lifestyle) risk factors for the metabolic events predisposing to cardiorenal disease, as well as the metabolic effects derived from pharmacological/non-pharmacological interventions for cardiorenal disease and vice versa.

## About the Journal

### Message from the Editor-in-Chief

*Healthcare* is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with Healthcare and its members receive discounts on article processing charges.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1  
(Leadership and Management)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
