Special Issue

Improving Digital Interventions for Health: The Role of Health Literacy

Message from the Guest Editors

Digital technology is promising with respect to accessibility of health care, in the light of current major challenges, for instance shortage of skilled workforce, financial restraints, movement toward value-based health care and health equity. The use of digital technology is promising with respect to some of these challenges, at the same time, has enhanced health inequity. This Special Issue is dedicated to the subject of health literacy in relation to health inequity and the use of eHealth applications. We welcome authors to submit their manuscripts on, but not limited, the following themes:

- The relationship between digital technology and health literacy;
- The consequences of (low) health literacy and accessibility of current health care;
- Tools to measure health literacy;
- Interventions to address health literacy, including digital literacy;
- Perspective and role of professionals in addressing health literacy, including digital literacy;
- Experiences and best practices to address health literacy in the context of the current development of eHealth;
