

## Special Issue

# Alcohol Hangover Effects on Human Health

### Message from the Guest Editor

We would like to invite you to contribute a paper to this upcoming Special Issue in Healthcare. The Special Issue will focus on the impact of alcohol hangover on physical and mental health. Alcohol hangover is defined as “the combination of negative mental and physical symptoms experienced after a single episode of alcohol consumption, starting when blood alcohol concentration approaches zero” (Verster et al, 2020). Increasingly, alcohol hangover is recognised as a wide-reaching consequence of alcohol use. As a result, alcohol hangover is a growing field with research spanning many disciplines of health and has the potential to impact practice and policy surrounding alcohol use. This special issue aims to bring together research across fields including psychology, public health and pharmacology. This issue will shed light on emerging experimental and theoretical work that can be used to guide public health policy and interventions targeted at reducing hazardous and harmful alcohol use. We look forward to receiving your contributions to this special issue addressing the impact of alcohol hangover on human health.

### Guest Editor

Dr. Sally Adams

Addiction and Mental Health Group, Department of Psychology,  
University of Bath, Bath BA2 7AY, UK

### Deadline for manuscript submissions

closed (31 December 2021)
