

## Special Issue

# Cardiovascular Diseases: Education, Prevention and Treatment

### Message from the Guest Editor

Cardiovascular diseases are still a major cause of morbidity and mortality throughout the world and contribute significantly to the increasing costs of healthcare. Most cardiovascular diseases might be avoided with early prevention. Thus, preventive healthcare has a crucial role. Future studies should focus on new opportunities for enhancing education, prevention, early diagnosis, and treatment of these patients to improve outcomes. Therefore, studies exploring education, prevention, and treatment of cardiovascular diseases are welcome in this Special Issue.
