

Special Issue

Inequality in Health Systems

Message from the Guest Editor

The world is certainly a better place to live in today than it used to be, with some previously impoverished parts of world experiencing positive developments that are helping them to escape from income/health inequalities. There is, however, still a long way to go, and the issue of health and income inequality is not one that need only concern poor countries, but also rich and developed ones. The combination of poverty, health inequality, and racism has opened up gaps and led to an urgent need for a plan-to-action to fix an unequal world. In this Special Issue, we would like to examine in depth the several aspects of income/health inequality and their combinations with poverty, racism, and disparities. See more information at: "[Inequality in Health Systems](#)". Some of the main areas to be covered in this issue include:

- Poverty, income inequality, and health outcome;
- Market, inequalities, and health outcome;
- Lobbying, rent-seeking and health inequality;
- Health inequality, poverty, and access to healthcare;
- Health inequality in the modern world;
- How to help those who are left behind.
