Clinical Trials in Antenatal and Intrapartum Care

Message from the Guest Editors

The obstetric field provides a challenging arena for conducting good quality research. Recruitment may be hampered by the 24-hour, fast-paced, labour ward environment, and by the ethical concerns around intrapartum consent. Other research challenges include the low-incidence but serious outcomes of a primarily healthy population, the need for long-term neonatal follow-up, maternal disregard for her own health relative to that of the foetus and strong socio-cultural beliefs around childbirth. This Special Issue showcases examples of recent work where judicious trial design and methodology has addressed these obstacles, in defiance of the common misconception that non-evidence-based obstetric practice is acceptable.

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
