Mental Health Matters: From Cross-Cultural Perspectives

Message from the Guest Editors

Awareness of mental health has been increasing rapidly worldwide in recent years, and even more so since the outbreak of COVID-19. Depression is now regarded as one of the most debilitating diseases of all, and wellbeing is incorporated into the United Nation's Sustainable Development Goals. In order for all of us to have a happy life, mental health cannot be ignored. As the UK government announced, our health cannot be achieved without good mental health. We are interested in various types of manuscripts, including original research, systematic reviews, reviews, mini-reviews, policy and practice reviews, perspectives, clinical trials, case reports, community case studies, brief research reports, and general commentaries.
