

Special Issue

Nursing Education and Health Promotion

Message from the Guest Editors

The main purpose of this Special Issue is to present scientific evidence on nursing education in the context of implementing health promotion. Nurses play a key role in the implementation of health promotion. We welcome papers exploring the professional education of nurses preparing them for the realization of health promotion programs; conceptual foundations for the development of education programs in this field; examples of innovative teaching strategies and methods aiming at the development of nurses' competences to provide effective health promotion; analysis showing the relationship between nursing education and activities undertaken to promote the health of clients with different health conditions and with different needs; and examples of good practices regarding nursing education and its impact on professional practice in the scope of health promotion. All levels of nursing education, and all areas of health care systems, may be considered. For more information, please see: "[Nursing Education and Health Promotion](#)".
