Prevention and Clinical Treatment of Alzheimer's Disease

Message from the Guest Editor

Alzheimer's disease (AD) is a multifactorial disease in the elderly population, spreading at the global level. As of now, there are no specific treatment and cure for AD. The search for molecules with less adverse effects than the available drugs has led researchers to investigate novel low-molecular-weight hybrid compounds of either synthetic or natural origin. Extensive research has been focused on natural products. In particular, biophenols have shown promising properties, being able to reduce AD pathogenesis in both in vitro and in vivo models. This Special Issue, invites manuscripts (research, review, opinion and case studies) improving the current understanding, clinical prevention and treatment perspective of AD through the investigation of new biomarkers, the properties of A β and tau peptides, the role of enzymes and genetic mutations.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with Healthcare and its members receive discounts on article processing charges.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
